

THE COMMISSIONERS

Who, beyond your original group of commissioners, do you need to engage?

Not everybody needs to be in the group of commissioners. You can also distinguish the stakeholders to be met and consulted, and groups of people you know it is important to communicate with.

[HELP] THE COMMISSIONERS

They will :

- include environmental sustainability in core business strategies
- formally recognize environmental responsibilities in roles
- have an ethical sponsorship policy
- aim to include environmental sustainability in artistic/ production briefs and open calls
- will influence others with the commission process but also with the communication about the process and the artwork
- by implementing sustainable thinking in the planning, by including it in briefs and open calls, and commissioning work that specifically addresses environmental responsibility, including climate justice.
- Work collectively to develop the idea towards the most sustainable possible outcome, ensuring that it meets green targets.
